Modules

 Stratified (Ctrl+1)	 Edit (Shift+1)	 Delete (Alt+1)
 Stratified Cluster (Ctrl+2)	 Edit (Shift+2)	 Delete (Alt+2)
 Stratified Multistage (Ctrl+3)	 Edit (Shift+3)	 Delete (Alt+3)
 Three-Stage RHC (Ctrl+4)	 Edit (Shift+4)	 Delete (Alt+4)
 Three-Stage Unrestricted (Ctrl+5)	 Edit (Shift+5)	 Delete (Alt+5)
 Two-Stage RHC (Ctrl+6)	 Edit (Shift+6)	 Delete (Alt+6)
 Two-Stage Unrestricted (Ctrl+7)	 Edit (Shift+7)	 Delete (Alt+7)
 Unrestricted (Ctrl+8)	 Edit (Shift+8)	 Delete (Alt+8)

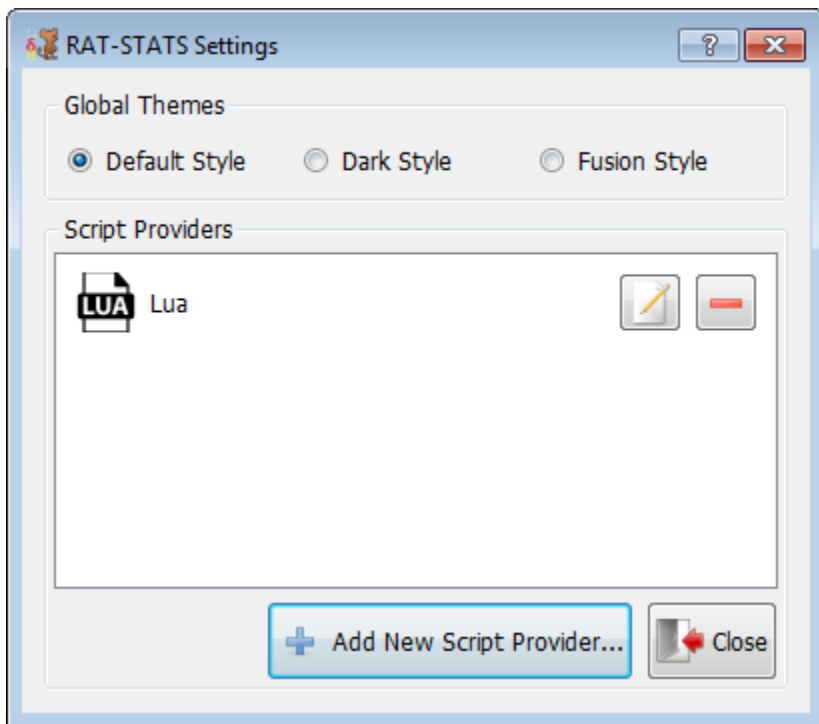

## Categories

The categories feature is used to organize related modules. When no more modules exist for a particular category then it is automatically removed from the list. Users may create new categories in the “New Module” dialog.

## Modules

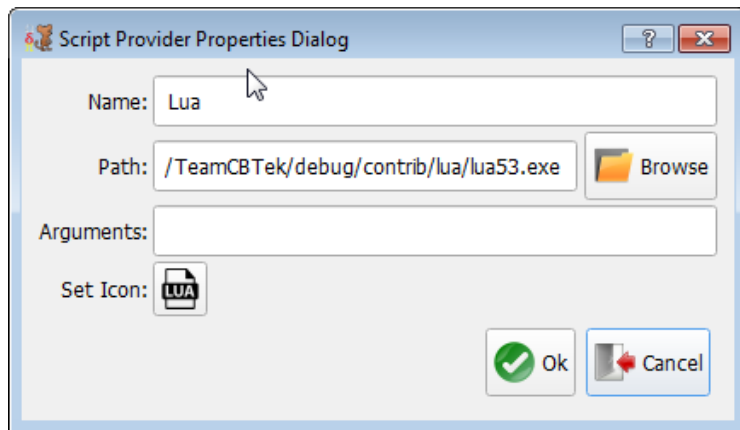

A module represents an internal/external program that can be launched by the user from the RAT-STATS main menu. The modules table showcases all modules that are defined and/or available for execution

## Settings

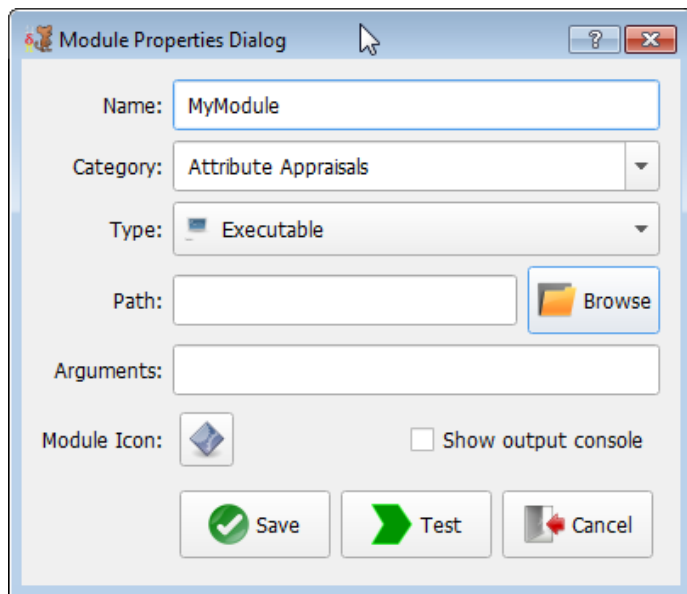

The settings dialog allows the user to change the graphical theme as well as add/edit script providers.

## New/Edit Script Provider

This dialog allows users to add additional scripting engines to RAT-STATS extending module support to custom scripts.

## New/Edit Module

The New/Edit module dialog allows the user to extend RAT-STATS with additional modules/executables.

## Menu / Keyboard Shortcuts

Menu	Keyboard	Description
